

*How to access the page:*

- This is the Home Page of accesSPoint. The user will get to this page after they log in.

*Purpose of the page:*

- This page is the main page when a user logs into accesSPoint.

*Page content:*

- On the navigation bar from left to right, the logo, page title, all the icons that are existing in the body of the page, the home button, the flag, and the Sign Out button.

*Buttons, contextual links and other interactive features:*

- When clicking the house button on the navigation bar, it will take the user right to the home page. The user can click on the images under each label, "Profile, Task, My Classes, etc." to get to the page. These images are also portrayed on the navigation task bar in the order of how the labels are organized. We have kept this to make navigation easier when they're on a different page instead of click home.

*Navigation options:*

- We have a global navigation bar. Includes the logo, page title that the user will be on, and the icons that users would see, which are the exact same ones from the body of the home page. The purpose of the icons at the top is for easier access to other pages rather than going home to get to a different page.

- How to access the page:
- From the home page click Search for classes, once directed there you will fill in the given fields to meet the criteria. Click Search to access the Results Page
- Purpose of the page:
- This page is the Results page that shows the classes from search page, all accessed from the Home Page
- Page content:
- On the navigation bar from left to right, the logo, page title, all the icons that are existing in the body of the page, the home button, the flag, and the Sign Out button. Left side of page, search for classes, can find online classes, view open closed classes, and the Course catalog
- Buttons, contextual links and other interactive features:
- When clicking the house button on the navigation bar, it will take the user right to the home page. These images are also portrayed on the navigation task bar in the order of how the labels are organized. We have kept this to make navigation easier when they're on a different page instead of click home. Also, from search results you have the option to click on the course listed and view the description on that certain class within that link.
- Navigation options:
- We have a global navigation bar. Includes the logo, page title that the user will be on, and the icons that users would see, which are the exact same ones from the body of the home page. The purpose of the icons at the top is for easier access to other pages rather than going home to get to a different page.
- Error conditions:
- An error that could potentially occur while viewing the
